

REMARKS/ARGUMENTS

I. Concerning the Amendments

The specification is amended to add traditional headings.

The claims are amended to place the application in condition for allowance, namely Claim 3 is rewritten in independent form to remove the objection thereto, certain dependent claims are amended to depend only from allowed Claim 5, and the withdrawn and other remaining claims are cancelled without prejudice to including them in a continuation and/or divisional application.

II. Concerning the Rejection over Prior Art

All rejections are believed to be moot in view of the amendments presented herein.

III. Conclusion

For the foregoing reasons, reconsideration of the claims and passing of the application to allowance are solicited.

Respectfully submitted,
